The Defense Technical Information Center (DTIC) is the central scientific, research, and engineering information support activity for the Department of Defense (DoD).

DTIC facilitates performance of responsibilities of the Under Secretary for Research and Engineering in accordance with DoDD 5134.3; and executes the programs and functions of the DoD Scientific and Technical Information Program (STIP), as specified in DoDI 3200.12 and DoD Manual (DoDM) 3200.14.

Access to the R&E Gateway

DTIC’s R&E Gateway (controlled unclassified) is limited to eligible users, who include DoD employees, DoD contractors, federal government employees, and federal government contractors. Accessing DTIC’s sites is easy. Users with a Common Access Card (CAC), Personal Identity Verification Card (PIV), or External Certificate Authority (ECA) can log in for immediate access.

- **Common Access Card (CAC)** smartcard - issued to active duty service members, DoD civilian employees and DoD contractors who are under DoD contract and are sponsored by a DoD Service or agency.

- **Personal Identity Verification (PIV)** card - issued to qualified employees and contractors of US federal agencies. The issuance process for PIV card varies from agency to agency. More information can be found at piv.idmanagement.gov.

- **External Certificate Authority (ECA)** certificate - issued by commercial organizations doing business with the DoD or US federal agencies to industry personnel who do not qualify for either a CAC or a PIV. Learn more at: identrust.com/certificates/-dod-eca-programs or eca.orc.com.

Email dtic.belvoir.us.mbx.dtic-access.mail.mil for access assistance with R&E Gateway on NIPR or SIPR network.
For more than 74 years, DTIC has served the information needs of the defense community through the collection and preservation of DoD’s multi-billion dollar investment in science and technology. This collection now exceeds 4.5 million documents—technical research, financial, international agreement, and programmatic science and technology—that are available to DoD Labs, academia, federally funded research and development centers, and industry partners.

DTIC’s flagship knowledge management hub—the R&E Gateway—provides easy access to public, controlled unclassified, and classified information records, making them available to eligible users. DTIC also administers the Information Analysis Center (IAC) program for the Department. The IACs provide research and analysis support to DoD through flexible, scalable contract vehicles that offer access to a network of industry and academic scientists and engineers.

DTIC’S website for public information
https://discover.dtic.mil

Search S&T reports, peer-reviewed scholarly articles generated from DoD research, DoD grant awards, DoD investment budget data, and conference proceedings.

R&E Gateway for controlled unclassified information
https://www.dtic.mil

Access DoD’s controlled unclassified science and technology activities, from initial investments through the final research reports. Identify the maturity of technology, where work is being done, funding by research category, subject matter experts, and international agreements with partners.

R&E Gateway for classified information
https://www.dtic.smil.mil

Review DoD’s classified science and technology activities, from research progress reports through the final research reports. Discover where work is being done in the Services and who the subject matter experts are.
