WHICH CERTIFICATE TO USE?

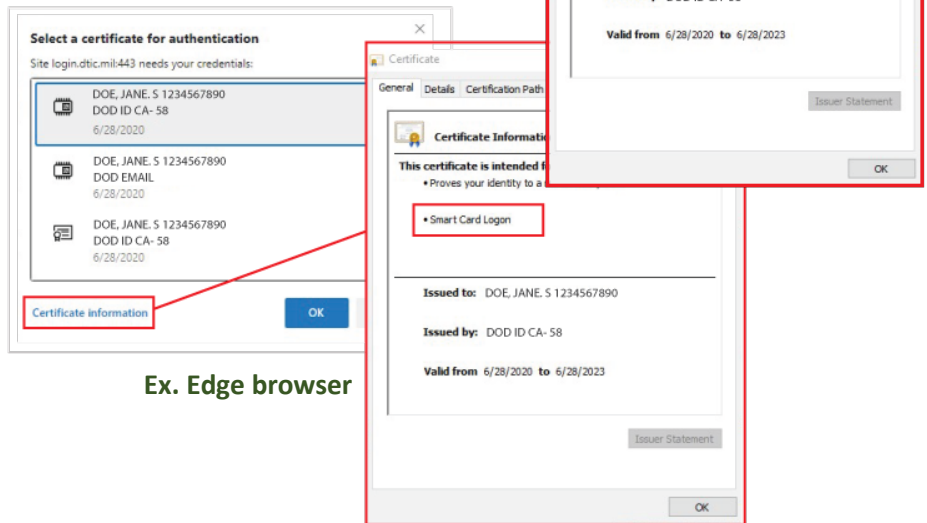

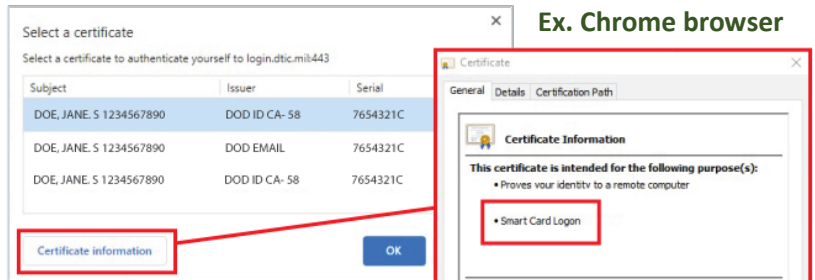

CHROME AND EDGE BROWSERS

Select the certificate that has a **Smart Card Logon** attribute.

How to determine:

Select a certificate >> select **Certificate Information** at the bottom

Another window will open. Look for **Smart Card Logon** in the window under Certificate Information. Use that certificate.

MOZILLA FIREFOX BROWSER

Select the certificate that has the **Authentication** attribute.

How to determine:

You will need to open **ActivClient Agent**. >> On the right side of the window select **View My Certificates** >> Select the **Authentication** certificate. >> Right click on the certificate to **View this certificate**. Take note of the serial number listed.

Return to the **Firefox browser** and then select the certificate with that serial number. Note* You may need to use the **∨** symbol to show additional certificates.
